

# Nursery Knowledge Organiser Summer Term

## What we already know

That there are lots of different animals.

Lots of the different names for animals and some of their features.

What my immediate environment looks like and be able to talk about objects in my environment.

Who my family and friends are.

## Words that will help me

Animals	Family	Friends	Plants	Environment
chicks	Mum	boy	seed	Nursery
ducklings	Dad	girl	bulb	sand area
egg	Brother	school	grow	water area
hatch	Sister	Play	water	bikes and trikes
cocoon	Nan/Grandma	toys	Soil	slide
caterpillar	Grandad	pals/buddies	compost	garden
butterfly	Cousins	fun	sun	climbing frame/wall

## What we will find out:

How to care for our immediate environment and how to care for plants and animals of different types.

What minibeasts live in our garden and how to help them and be careful with them. We will go on minibeasts hunts outside.

How chicks and ducklings hatch from fertilised eggs and how they grow and develop over time.

Lots of new information about animals and plants and that this information can be found on the internet and from non-fiction books.

The process that caterpillars go through to turn into a butterfly by watching them and observing the changes.

What animals and plants need to help them to grow and develop - water, food, light etc.

How we are unique and what makes us both similar and different to others in relation to family and friends.

Why our friends are important to us, and sharing the things we like to do together.

## Some stories we might read

The Very Hungry Caterpillar

From chick to hen

The Ugly Duckling

The Hen can't help it

Rosie's Walk

The little red hen

We may become authors and photographers and write our own information book about looking after chicks and ducklings
