

Leamington Primary Science Knowledge Organiser Year 1

What I should already know	What I will learn	Important words to help me. (vocabulary)		Useful Diagram																																				
The names of some body parts.	<p>What are the different parts of our bodies called?</p> <p>We will learn:</p> <p>- hand, arm, back, legs, hair, mouth face, eyes, nose, ear, lips, knee, head, feet, shoulders.</p> <p>What are our five senses?</p> <p>We will learn all about our five senses. We will explore what they are and how they help us with hands on activities.</p>	<table><tr><td>Senses</td><td>Any of five ways to understand what is around us.</td></tr><tr><td>Taste</td><td>Experiencing the flavour of something.</td></tr><tr><td>Touch</td><td>To experience how something feels.</td></tr><tr><td>Hear</td><td>To receive sounds with our ears.</td></tr><tr><td>Smell</td><td>To use our noses to identify smells.</td></tr><tr><td>See</td><td>To use our eyes to look.</td></tr><tr><td>Ankle</td><td>the joint between the leg and the foot</td></tr><tr><td>Back</td><td>the backbone; spine.</td></tr><tr><td>Body</td><td>the main part of a person or animal</td></tr><tr><td>Chest</td><td>the upper front part of the body between the neck and waist.</td></tr><tr><td>Ears</td><td>the organ of hearing in people and some other animals.</td></tr><tr><td>Elbow</td><td>the bend or joint between the upper arm and the lower arm.</td></tr><tr><td>Eyes</td><td>the organ of the body that gives animals sight</td></tr><tr><td>Feet</td><td>The end part of your leg.</td></tr><tr><td>Waist</td><td>the part of the human body between the chest and hips.</td></tr><tr><td>Head</td><td>the top or leading part of an animal body.</td></tr><tr><td>Hips</td><td>the part on either side of the body between the waist and the thigh.</td></tr><tr><td>Knees</td><td>the joint between the upper and lower parts of a human leg.</td></tr></table>		Senses	Any of five ways to understand what is around us.	Taste	Experiencing the flavour of something.	Touch	To experience how something feels.	Hear	To receive sounds with our ears.	Smell	To use our noses to identify smells.	See	To use our eyes to look.	Ankle	the joint between the leg and the foot	Back	the backbone; spine.	Body	the main part of a person or animal	Chest	the upper front part of the body between the neck and waist.	Ears	the organ of hearing in people and some other animals.	Elbow	the bend or joint between the upper arm and the lower arm.	Eyes	the organ of the body that gives animals sight	Feet	The end part of your leg.	Waist	the part of the human body between the chest and hips.	Head	the top or leading part of an animal body.	Hips	the part on either side of the body between the waist and the thigh.	Knees	the joint between the upper and lower parts of a human leg.	<div><p>The Five Senses</p></div> <div><p>Parts of the Body</p></div>
Senses	Any of five ways to understand what is around us.																																							
Taste	Experiencing the flavour of something.																																							
Touch	To experience how something feels.																																							
Hear	To receive sounds with our ears.																																							
Smell	To use our noses to identify smells.																																							
See	To use our eyes to look.																																							
Ankle	the joint between the leg and the foot																																							
Back	the backbone; spine.																																							
Body	the main part of a person or animal																																							
Chest	the upper front part of the body between the neck and waist.																																							
Ears	the organ of hearing in people and some other animals.																																							
Elbow	the bend or joint between the upper arm and the lower arm.																																							
Eyes	the organ of the body that gives animals sight																																							
Feet	The end part of your leg.																																							
Waist	the part of the human body between the chest and hips.																																							
Head	the top or leading part of an animal body.																																							
Hips	the part on either side of the body between the waist and the thigh.																																							
Knees	the joint between the upper and lower parts of a human leg.																																							
Interesting Facts	We will also explore how we are all unique and have different hair and eye colours.																																							
We taste food using both our sense of taste and smell.																																								
Ideas for Scientific Enquiry																																								
*Explore our senses and how they help us.																																								

*Name part of the body.

*Collect data and compare hair and eye colour of our peers.

Human Body & Five Senses – *How do our senses help us?*
